

Thank you for purchasing this Radio.

We believe this easy-to-use radio will provide stable and reliable communication for you.

QS Radio incorporates the latest advanced technology.

As a result, we know that you will be pleased with the quality and features of this product.

## PRECAUTIONS BEFORE USING

---

Please read the User's Manual before using. It gives you important information about how to operate the portable radio.

---

Please put the radio and accessories where the children can not reach.

---

Maintenance can only be performed by professional technicians.

---

Please use the standard battery pack and charger in order not to destroy the radio.

---

Please use the standard antenna, in order not to shorten the distance.

---

Do not expose the radio to sunlight for a long period of time, nor put it near the heat, nor use it in a high temperature environment.

---

Do not put it in extreme dust or wet nor on unsteady surfaces.

---

Keep it dry. (Rain or moisture will erode the electronic board).

---

Do not transmit when the antenna is not installed.

---

If you find bad smell or smog, please turn off the radio immediately. And take the battery off the radio, then contact with QS agent.

---

## FEATURES

- Available in 3 beautiful colors
- Voice prompt (Chinese or English)
- Jacklight
- CTCSS/DCS
- PTT-ID & DTMF
- PC programmable
- Channel scan
- Time-out-timer(TOT)
- Low power alarm
- Wide/Narrow bandwidth
- Squelch level adjustable
- High/Low power selective
- Dual-watch operation
- 1750Hz call tone
- Tail tone elimination

## SUPPLIED ACCESSORIES

Carefully unpack the portable radio. We suggest that you check the following items before you throw away the packing materials.

### STANDARD SUPPLIED ACCESSORIES

ITEM	QTY
Portable radio	1
Antenna	2
Li-ion battery pack(3.6V)	1
Battery charger	1
Belt clip	1
User's manual	1

### STANDARD SUPPLIED ACCESSORIES

Antenna

Li-ion battery pack (3.6V)

Belt clip

Battery charger

User's manual

## CHARGING NOTES (1)

### Charging the Li-ion battery pack:

- Battery packs are not charged when they are shipped. Charge them before using.
- Initially charging the battery pack after purchase or extended storage (longer than 2 months) will not bring the battery pack to its greatest capacity, which can be done only after repeated charging and discharging two or three times.
- The average use time of battery pack is 15 hours
- After the battery is charged to its highest capacity, and then use it on the radio. If the radio still shows low power, please change a new battery pack.
- Do not short-circuit the battery terminals or throw the battery into fire.
- Never attempt to remove the casing from the battery pack.

## CHARGING NOTES(2)

- Slide the Li-ion battery pack or radio with a Li-ion battery pack into the charger.
- 1 Make sure the battery pack is in connected with the charging terminals.
  - 2 When charging begins, the RED LED light displays; when the battery pack is charged to it's greatest capacity, the GREEN LED light displays.
  - 3 If the capacity of the battery is too low, the red indicator will glitter, and it will return to red light after some minutes.

- After the GREEN LED light displays, take the battery pack or the portable radio out of the charger.

## ATTACHING BATTERY PACK

- Slide the battery pack into the back of the radio in the direction of the arrow(①), then lock it with the battery releasing button. Slide the battery pack until the battery releasing button makes a “clicking” sound.

## RELEASING BATTERY PACK

- 1 Turn off the radio before releasing the battery pack.
- 2 Push the battery releasing button in the direction of the arrow(①).
- 3 Slide the battery pack in the direction of the arrow(②), and take off the battery pack lightly.

## INSTALLING ANTENNA

- Attach the antenna to the radio as illustrated on the right.

## INSTALLING BELT CLIP

- Attach the belt clip with the supplied screws by a phillips screw driver.

## INSTALLING SPEAKER/MICROPHONE COVER

- If you are not using a speaker/microphone, install the speaker/microphone cover. (The cover has been fitted when the radio is made.)

To keep the radio rain-resistant, you must install water-proof speaker/microphone cover.

## INSTALLING EXTERNAL SPEAKER/MICROPHONE

- Insert the speaker/microphone plugs into the speaker/microphone jacks.

The radio is not fully rain-resistant while using the external speaker/microphone.

## DIAGRAM

## BASIC OPERATION

### Power/Volume Adjusting

- Turn the Power/Volume knob clockwise to turn the power on. When you turn it on, it will beep and you will hear the voice prompt of the current channel. (AS P-1)
- Press and hold the monitor button, then rotate Power/Volume knob to turn up and down the volume(AS P-2)

P-1

P-2

### Channel Knob

- Rotate the channel knob to choose your desired channel. (AS P-3)  
When you receive a signal, the speaker will make a sound.

P-3

### PTT Key

- To make a call, press and hold the "PTT" key, then speak to the microphone in normal tone.  
Please keep the microphone 3-4cm away from your lip.

P-4

## FUNCTION INSTRUCTION

### Voice Prompt (Chinese or English)

You could set Chinese or English as the voice prompt by programming software.

### Jacklight

Press(Jacklight key), the jacklight is ON. Press it again, the jacklight is OFF.

### CTCSS/DCS

Set up workgroups/users with unique CTCSS/DCS to prevent disturbance in the same frequency.

CTCSS: 50 groups     DCS: 208 groups.

### Channel Scan

Rotate the channel knob to channel 16, press Monitor key to turn on the radio, you will hear the voice prompt of "Scan" . It will scan from channel 1 to channel 16. Turn off the radio to exit.

(NOTE: There must be frequency in channel 16.)

### PC programmable

Plese use QS standard programming software. You can set the following features through the software: Time-out-timer, Squelch level, Voice prompt, CTCSS/DCS, Wide/Narrow bandwidth, High/Low power selection, Tail tone elimination, PTT-ID.

### Time-Out-Timer (TOT)

To limit the calling time, the radio will stop transmitting, and you will hear the warning tone if it transmits over the set time.

## FUNCTION INSTRUCTION

### Low Power Alarm

Audible tone will remind you when the battery is running down.

### Wide/Narrow Bandwidth

Frequency space>25KHz, it is wide bandwidth.

Frequency space<25KHz, it is narrow bandwidth.

### Squelch Level Adjustable

It helps to minimize interference from undesired signals and helps weak signals to be heard.

### High/Low Power Selective

You can choose high or low power through the programming software.

### Dual-watch Operation

“Dual-watch” between the current working channel and channel 16.  
The current working channel can receive its own frequency as well as the frequency of channel 16.

NOTE: There must be frequency in channel 16.

The operation steps are as follows:

- Press Monitor key to turn on the radio, and you will hear the voice prompt of “scan”. Rotate the channel knob to the channel you want to set, the channel will be in “dual-watch” with channel 16.
- It could transmit only the frequency of the current channel by pressing PTT without receiving the signal of channel 16, and it could communicate with the 16th channel only after receiving the signal of channel 16.

## FUNCTION INSTRUCTION

- After the signal disappears for 5s, it comes back to “dual-watch”. Turn off the radio to exit.

### PTT-ID & DTMF

This function can set the sound when you press key PTT to transmit or release to send PTT-ID.

- Set up parameters in the programming software. (Pls download the corresponding software in Quansheng official website.)
- Connect the computer and the radios by specified programming cable, then read the information from the radio; Open “toolbar”, click “edit”, then click “optional functions”, then to set the parameter.
  - A. DTMF CODE: sending the DTMF characters.
  - B. PTT: setting the sending mode (Press: TX; Release: TX; Both)
  - C. PTT-Prolong: setting the prolong time of the radio's PTT-ID (100ms - 1000ms) Pls click PTT-ID “ON” or “OFF” when setting the parameter (Note: Select “OFF” when using in case of affecting the radio)

### 1750Hz Call Tone

- Read the information from the radio, open “toolbar”, click “edit”, then click “optional functions”, then select “ON” or “OFF” in the PTT parameter list.
- Press PTT+BAND to send 1750Hz call tone. (This function is for the repeater of European market.)

### Tail Tone Switch

The radio will send closing command of tail tone squelch to receiving radio when call is end, the receiving end won't hear “beep” tail tone.

## FUNCTION INSTRUCTION

- Please click “Edit” and select open or close tail tone elimination in “Option function” box after read-in radio.
- Pls open it in normal use, at lest there is always “beep” when the call is end. (Note: The “Tail tone elimination” and “Tail tone test” are valid only when you open it.)

### Tail Tone Elimination

To make a delay in closing receiving channel after receiving close command of tail tone squelch function.

- You can select the tail tone elimination in “Option function” box after click “Edit” in PC program, then set 100ms -1000ms to adjust the length in closing receiving channel.

### Tail Tone Test

To make a delay in closing transmitting command after the radio send close command of tail tone squelch function automatically.

You can select the tail tone elimination in “Option function” box after click “Edit” in PC program, then set 100ms -1000ms to adjust the length of delay in closing transmitting command.

## SPECIFICATIONS

### GENERAL

Frequency Range	136~174MHz/400~480MHz
Rated Voltage	DC 3.6V(Rechargeable Li-ion battery)
Memory Channel	16channels
Antenna Impedance	50Ω
Working Manner	Same frequency single operation or different frequency single operation
Dimensions(H*W*D)	128.4mmX66.4mmX46mm(without antenna)

### TRANSMITTER

Output Power	≤5W
Modulation Mode (W/N)	16KΦF3E/11KΦF3E
Maximum Frequency Deviation (W/N)	≤5KHz/≤2.5KHz
Spurious Radiation	≤7.5μW
Preemphasis Character	6dB/Per fold
Emission Current	≤ 1.3A
CTCSS/DCS Frequency Deviation (W/N)	0.7±0.1KHz/0.4±0.1KHz
Modulation Sensitivity	8 -12mV
Modulation Distortion	≤10%

### RECEIVER

Sensitivity	≤0.25/0.28μW
Modulation Receiving Bandwidth	≤5KHz/≤2.5KHz
Audio Power	≤0.5W
Audio Distortion	<10%
Blocking	≥85dB
Intermodulation (W/N)	≥60dB ≥55dB
Adjacent Channel Selectivity(W/N)	≥65dB ≥60dB
Spurious Rejection	≥65dB

All stated specifications are subject to change without notice or obligation.
